Year's Fun Fly.

LARCC Meeting Minutes, October 17, 2007

President Richard called the meeting to order.

Treasurer's report approved as given.

Secretary's report was approved as printed in the October newsletter.

Old Business

1. Discussion continues debating the rubber runway. We would not be responsible for removal and disposal. Another option would be to use a push-mower for a shorter "green" for electrics to take off. The club unanimously agreed not to take the generous offer of the rubber matting.

New Business

1. The LARCC thanks Bill Mash for the generous donation! Thanks again Bill!

2. Discussed creating Certificates of Achievements for past and present members. Mark, Lyle and Kevin will present options and format a framework for a list of suggested recipients. Thanks Guys!

3. Decided to move the wood LARCC road sign in spring and discussion will continue then on a replacement.

4. Charlie took home the white mower and gave it an overhaul. Thanks Charlie for all of the maintenance help!! Charlie also suggested the mowers and tags be taken in and professionally overhauled twice a year due to their use.

LARCC Information

Official Web Site Address: <http://www.larcc.com>
Contact Sue at the above information if you have questions or would like to have something published to the site.

From The Prez

I hope to see many of you at the November meeting. Since we are back indoors again the meeting will be at the City Limits. Unfortunately it is the day before Thanksgiving, I hope it doesn't interfere with anyone's travel plans.

It sure is hard to believe that another flying season is behind us. I guess it's time to start looking at those workshop projects. Personally, I haven't decided on any new projects for winter. I have one or two incomplete projects, which unfortunately, will have to take precedence. Even though I enjoy building in the workshop, it's just not the same as being out flying.

Keep 'em Flying
and
Be Safe

Richard

You're Addicted to RC, When...

AMA Insider

*From the Sacramento Valley Soaring Society,
Novato, California*

- You read nothing but transmitter and model manuals in the bathroom.
- You have converted a mobile home to have room for all your airplanes with just space enough to sleep.
- Your RC insurance costs more than your car's.
- You have something RC within a radius of 5 feet from you at all times.
- You've heard, "Hey that looks just like the airplane I tossed in the bin after crashing last week," more than once at your flight field.
- A full-scale airplane passes overhead and you move your thumbs to match its movements.
- If you plan to go outside for any reason and it's windy, you go back inside again and find out when it's due to be calm next.
- When the power steering goes, you tell the people at the garage to change the servo.
- If you worked feverishly in all your free time, it would take three years to clear up your backlog of kits.
- You host a fun-fly when it's so cold that one of the events is starting your engine.
- You accept a crash as an opportunity to start a great new kit.
- Every time you pass a garage sale, you look for wings.
- If you spend more money at the local hobby shop in one hour than you make in a month.
- You keep your old van just to transport airplanes in.
- When you go to Home Depot and the PVC pipe and fittings section gives you ideas for new wing racks instead of plumbing projects.
- The smooth tarmac bike trail at your local park has funny airport markings sprayed on it.
- Your car has a ski box on its roof, yet you never go skiing.
- You have a "special room" for your airplanes.
- You have a gallon drum of adhesive in your shed.
- You have at least three different heating irons.
- Your neck shows a white strip, that is the same width as your transmitter strap.
