Contact Sue at the above information if you have questions or would like to have something published to the site.

**From The Prez**

Here we are just days before our fly-in. I have been watching the long range weather forecasts and today (Mon., Sept. 3rd) the outlook is favorable for the event on Sunday. Good weather will certainly be welcome after the rainy day we had last year.

The field is in excellent condition. It has recovered from the brown draught condition a few weeks ago very nicely to the lush green we like to see. It will require at least one mowing between now and the fly-in.

Let's not forget that we have a work day scheduled for Saturday the 8th. I believe we said that we will start at 10 am. We will have to do the normal setup work for the field and place the direction signs. The weather looks to be decent for Saturday also.

I look forward to seeing you all at the Fly-in.

Keep 'em Flying  
and  
Be Safe

Richard

**Buy-Sell-Swap**

**F-51 Mustang**

150 size with 150 Saito engine. Very detailed .... a real beauty and ready to fly **\$750.00**

G.P. [degree32@verizon.net](mailto:degree32@verizon.net)

**Stinson Reliant**

100 inch (150 size). Beautiful and ready to fly. **\$750.00**

G.P. [degree32@verizon.net](mailto:degree32@verizon.net)

**Midwest Mustang .60**

65 inch wingspan, 4 channel R/C airplane with RJL .61 engine. Flies great. **\$130**

Ron Acker 849-7610 [ronaldacker@tds.net](mailto:ronaldacker@tds.net)

**Saito FA-125A 4 Cycle Engine**

AAC w/Muffler used for a few flights **\$300**

Chris Galindo 608-494-0118

**Funtana 40**

Includes Magnum 91 Engine. Only flown by little old man on really nice days ☺ **\$300** Leroy Brandt at [lebrandt@charter.net](mailto:lebrandt@charter.net)

## RC Airplane Definitions

AMA Insider  
*From the Anoka County Radio Control Club,  
Inc., Coon Rapids, Minnesota*

**Prop Nut:** What a glider pilot calls power pilots.

**Pucker Factor:** A factor that exponentially gets higher, as your out-of-control airplane gets lower. At the high end of the scale, changing your shorts is necessary.

**P51 Mustang:** What beginners use to learn to fly.

**Radio:** An expensive electronic device to randomly alleviate overcharged batteries. A device that enables an airplane to crash different places than it normally would.

**Radio Glitch:** A documented electronic occurrence, causing immediate and irreparable loss of control. The source of a crash when there is a possibility of someone else's radio in close proximity to the airplane.

**Receiver:** The part of your airplane that picks up interference.

**Sink:** Non mythical meteorological event stimulated by RC Soaring pilots.

**Skid Protector:** Another word for a spinner.

**Snap Roll:** After a nice high G roll, something snaps, usually the wing.  
**Spinner:** A critical part of the landing gear.

**Stall:** What you tell your wife when you want to take it up "one more time."

**Swept Area:** The only part of your apartment that is not covered with balsa dust.

**Tail-dragger:** An RC pilot that has just spent the last hour looking for his airplane in the woods.

**Thermal:** A mythical occurrence of rising air.

**Tip Stall:** Offering several minutes worth of unwanted advice to a nearby pilot, instead of taking your turn to launch off the winch. Used when sink is in the air, and contest points are at stake.

**Trainer Cord:** A handy device for electronically installing false confidence into rookie pilots.

**Tree:** Implement used to separate wings from fuselage.

**Upwind Turn:** Same as downwind turn. NO, IT ISN'T! YES IT IS!! NO, IT ISN'T! etc.

**Wetted Area:** After Rex the wonder dog finds the pit area.

**Wing:** A device that, due to its airfoil, allows air to flow faster over the top, thereby allowing you the opportunity to pour excess funding into the resulting low pressure area.

## *Schultz Sport & Hobby*

**315 S. Thompson Road**

**Sun Prairie, WI 53590**

**(608) 837-3498**

**RC Airplanes, Trains**

**Hours 8 – 5 P.M.**
